

Table S6. Focal term form by five-year interval

Cell values are counts of included records ($N = 457$) by focal term form and five-year interval of publication year. Rows comprise the Corpus A politics-of-X forms and, for Corpus B, “political determinants of health”; records combining more than one focal term are shown as “Multiple / other.” The single early-access record dated 2026 is counted in 2021–2025. Row totals equal the focal-term-form counts in Table 1; the column totals give the number of included records per interval (Corpus A: 8, 10, 4, 17, 17, 34, 45, 57, 71, 66; Corpus B: 5, 10, 27, 86 from 2006–2010 onward). Both margins sum to 457.
